hyperirehalosemic neuropeptide Bld-HrTH - Madeira cockroach
C;Species: Leucophaea maderae (Madeira cockroach)
C;Species: Jo-Jun-1992 #sequence_revision 14-Sep-1994 #text_change 09-Jul-2004
C;Accession: S08998
R;Gaede, G.; Rinehart, K.L.
Biol. Chem. Hoppe-Seyler 371, 345-354, 1990
A;Title: Primary structures of hypertrehalosaemic neuropeptides isolated from the corponentalis and of the stick insect Extacosoma tiaratum assigned by tandem fast atom bombar.
A;Reference number: S08995; MUID:90253659; PMID:2340112
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                C;Accession: A26381

```
C;Comment: This neuropeptide, isolated from the eyestalks of the shrimp and active in p: zed pigment-containing cells.

Zed pigment-containing cells.

Z;Superfamily: adipokinetic hormone

C;Superfamily: adipokinetic hormone

C;Keywords: amidated carboxyl end; blocked amino end; hormone; neuropeptide; pyroglutam:

F;1/Modified site: pyrrolidone carboxylic acid (Gln) #status experimental

F;8/Modified site: amidated carboxyl end (Trp) #status experimental
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     A; Molecule type: protein

A;Title: The putative ancestral peptide of the adipokinetic/red-pigment-concentrating hc
A;Reference number: S10596; MUID:901359055; PMID:2390213
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    A; Residues: 1.8 <BIO>
A; Cross-references: UNIPROT: P25418
C; Comment: This peptide has both adipokinetic and hypertrehalosemic activities.
C; Superfamily: adipokinetic hormone
C; Superfamily: adipokinetic hormone
C; Keywords: amidated carboxyl end; corpora cardiaca; hormone; neuropeptide; pyroglutamic
F; I/Modified site: pyrrolidone carboxylic acid (Gln) #status experimental
F; 8/Modified site: amidated carboxyl end (Trp) #status experimental
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     isolated from the corportandem fast atom bombare
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               we have

C;Comment: Hypertrehalosemic factor II lacks the tryptophan modification.
C;Comment: This peptide raises hemolymph levels of trehalose in the cockroach Periplanet C;Superfamily: adipokinetic hormone
C;Keywords: amidated carboxyl end; glycoprotein; hormone; neuropeptide; pyroglutamic aci
C;Keywords: amidated carboxyl end; glycoprotein; hormone; neuropeptide; pyroglutamic aci
F;Blanding site: carboxyler acid (SID) #status experimental
F;Blanding site: carboxylend (Trp) (covalent) #status experimental

Sequence 13, Application US/09780070
Patent No. US20020009752A1
GENERAL INFORMATION:
APPLICANT: Burke, James
APPLICANT: Burke, James
APPLICANT: Strittmater, Warren
APPLICANT: Strittmater, Warren
TITLE OF INVENTION: COMPOUNDS THAT SELECTIVELY BIND TO EXPANDED POLYGLUTAMINE REPEAT
TITLE OF INVENTION: AND METHODS OF USE THEREOF
TITLE OF INVENTION: AND METHODS OF USE THEREOF
TITLE OF ILING DATE: 2001-02-09
CURRENT APPLICATION NUMBER: 66/189,781
PRIOR APPLICATION NUMBER: 66/189,781
PRIOR APPLICATION NUMBER: 66/189,781
NUMBER OF SEQ ID NOS: 40
SOFTWARE: PatentIn version 3.0
                                                                                                                                                                                                                                                                                         APPLICANT: Furet, Pascal TITLE OF INTERIOR OF PS3 and MDM2 TITLE OF INTENTION . Inhibitors of the Interaction of PS3 and MDM2 FILE REPERBUCE: 4-2093/A/PCT CURRENT APPLICATION NUMBER: US/09/214,371B CURRENT FILING DATE: 1999-03-26 PRIOR PPLICATION NUMBER: PCT/EP97/03549 PRIOR FILING DATE: 1997-07-04
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         FEATURE: OTHER INFORMATION: Description of Artificial Sequence:peptide
